When hygiene, price and flexibility matter

MODULAR FLAT TOP CHAIN CLICK TRANSPORT

The Modular Flat Top Chain Click Transport is designed to form a custom transport system in a flexible and price efficient way.

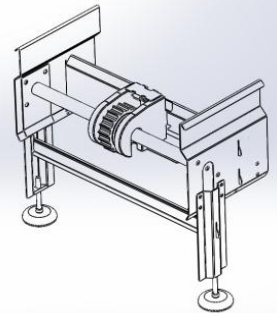

DRIVE SECTION

This section is used to drive the transport system in a safe and hygienic way.

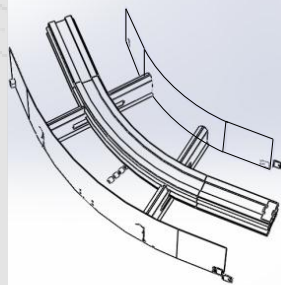

END SECTION

This section is used to form a safe and hygienic end of the transport system.

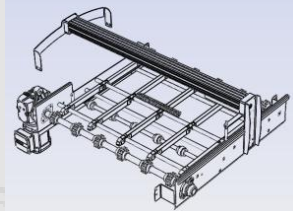

BEND SECTION

This section is used for the bends in the transport system. Bend radius and degrees may vary per bend section.

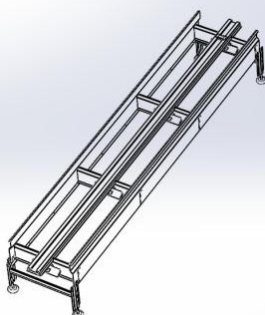

FUNCTION SECTION

Many function sections can be incorporated in the transport system. For example slider sections, side stopper sections and bottom stopper sections.

STRAIGHT SECTION

The straight section has a standard length of 3 meters, but can be shortened. Stopper sections, can be built in the straight section.
