

Modular HiA-belt click conveyors

- Easy to build on site
- Client specific sizing
- Floor, wall or ceiling mounting

DRIVE SECTION

This section is used to drive the transport system in a safe and hygienic way.

BEND SECTION

This section is used for the bends in the transport system. Bend radius and degrees may vary per bend section.

STRAIGHT SECTION

The straight section has a standard length of three meters, but can be shortened. Stoppers, can be built in the straight section.

END SECTION

This section is used, to form a safe and hygienic end of the transport system.

FUNCTION SECTION

Many function sections can be incorporated in the transport system. For example slider sections and stopper sections.

The Modular Flat Top HiA click conveyor system is designed to deliver a conveyor systems in a flexible and price efficient way. The belt transport is very useful for transporting products like bread and buns.

WHEN HYGIENE, PRICE AND FLEXIBILITY MATTER
