

Needle depanner

- Different types for different capacities
- Easy to install
- Safe

SAFETY

The Needle depanner is fitted with a protective fence. The controls for the machine are located at a safe distance from moving parts.

ECONOMICAL

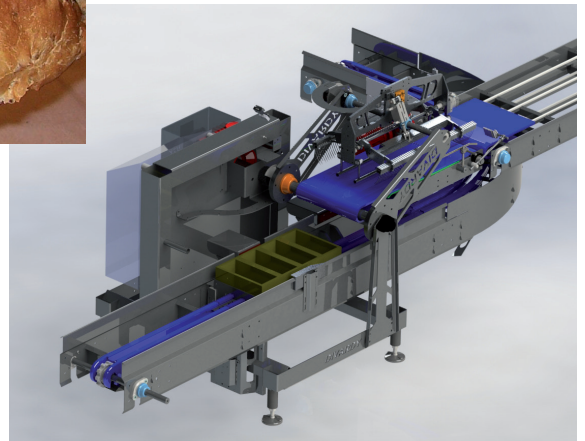

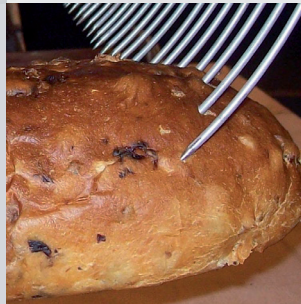

The Needle depanner is a silent machine, designed to function at optimum efficiency and with low energy usage.

FLEXIBILITY

The Needle depanner is very compact and can be easily installed in any transport system.

HYGIENE

The standard Divardy frame ensures an open and clean construction, easily to clean and to inspect for contamination.
